SYNERGY

Wireless Charging Station
for mobile devices

SYNERGY

Time to energize sport!

SYNERGY - a collaboration project of the two Russian companies, that combines their common ideas and aspirations, aimed at creating an innovative product that offers effective interaction with the person and the surrounding area. The image of the device was inspired by the upcoming football World Cup in 2018.

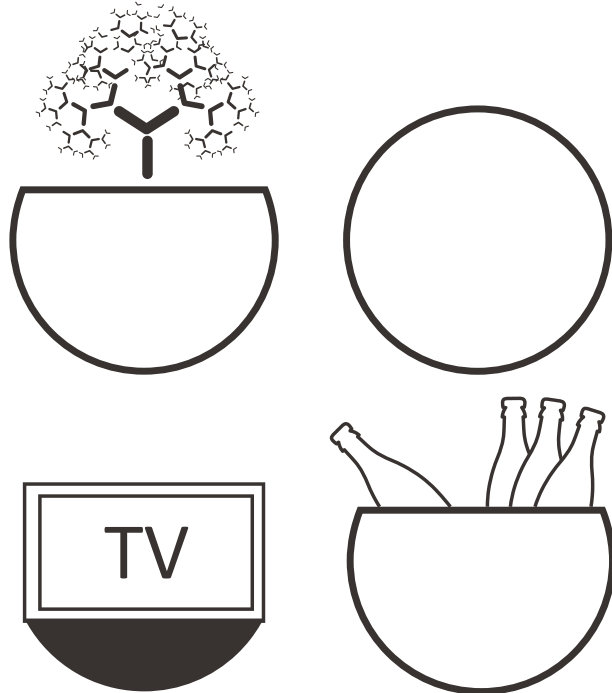

SYNERGY

SYNERGY station is designed for the wireless mobile devices charging in public spaces, stadiums, lounge areas, luxury lounges of airports, hotels and offices.

SYNERGY

Modularity

Removable top SYNERGY station module easily changes its function and may become a vase for flowers, the TV screen or a storage tank. Thanks to this solution an object can exist in harmony with any surrounding space.

- Individualization
- Simultaneous charging of up to 6 devices
- Interactive LED backlight
- Replaceable central modules
- Color options

SYNERGY

Branding

The main feature of the device is that it can be personalized easily. Due to the structure of the surfaces any company can brand this charge in accordance with its corporate style and harmoniously fit the object to the desired space. This is the first Public access wireless charger in Russia.

SYNERGY

Technology DuPont™ Corian® Charging Unit

Power transmission takes place via individual wireless charger, which is a dual-mode transmitter that is compatible with the requirements of standards PMA and WPC Qi. The charging process begins immediately after touching the mobile device to the surface of the table at a designated place.

For phones and tablets that do not have integrated receivers, this project includes the removable ring receivers with micro USB, Apple 30-pin and Apple Lightning® ports. The transmitter is configured to conduction through Corian® solid 8 mm surface material. The charging station SYNERGY transmitters are integrated into the body of the table.

DuPont™ Corian®

The world's leading brand in the production of high-quality finishing materials used in design, architecture and furniture.
